INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/002931

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	1-23	YES
	Claims		NO
Inventive step (IS)	Claims		YES
	Claims	1-23	NO
Industrial applicability (IA)	Claims	1-23	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

This report makes reference to the following document:

D1: WO 00/53557 A (BASF AG; HAMMON ULRICH (DE);
HARTH KLAUS (DE); ARNOLD HEIKO (DE); TEN)
14 September 2000 (2000-09-14)

The present application concerns a method for the heterogeneously catalysed partial gas phase oxidation of propene into acrylic acid.

D1 is the closest prior art and differs from the subject matter of claim 1 in that the initial reaction mixture 1 contains 3 - 3.5% water (cf. the passages listed in the ISR).

The technical problem of interest can therefore be considered that of developing a further method for producing acrylic acid. The solution proposed in claim 1 is not, however, considered inventive, since it is obvious to a person skilled in the art to use an initial reaction mixture 1 that contains more than 4% water.

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

Claims 2-23 do not contain any features which, in combination with the features of any claim to which they refer, meet the PCT requirements for novelty and inventive step.

The subject matter of claims 1-23 thus fails to satisfy the criteria in PCT Article 33(3).
